

Train towards a successful pilot career at your own pace

MODULAR PILOT TRAINING

Modular ATPL is a popular route for cadet pilots wishing to earn their ATPL licence (or up to a specific licence, depending on career goals) but also break their training into bitesize chunks. This allows time for personal

commitments, saving money or travel in between modules. This approach enables you to complete individual Modular ATPL courses and obtain licences and ratings based on your experiences and aspirations.

Modular ATPL
